

The Policy of **Peipel Steel Group, S.L. (PSG)**, dedicated to the stamping, drawing, cutting and welding of metal parts, is defined based on the expectations and needs of our customers and interested parties, and the nature, magnitude and environmental impacts of the activities, products and services developed. Therefore, it includes the objectives and commitments of Quality and Environment, appropriate to the purpose and context of the organization.

For this reason, PSG has decided to be certified under the IATF 16949 and UNE-EN ISO 14001 standards and thus improve the quality of the products supplied to customers in awareness of the environment, increasing in turn their satisfaction, always taking into account **COMPLIANCE OF ALL REQUIREMENTS**, including **LEGAL**, both those applicable to processes and products (including those related to product safety), and environmental ones.

To comply with the commitment to continuous improvement and that our clients continue to trust us, PSG bases its Policy on the following points:

- Achieve **CUSTOMER SATISFACTION** by detecting their expectations and needs, maintaining a close relationship to gain knowledge of the function of our products and thus achieve a better adaptation to their needs.
- Correctly define the requirements for raw materials and products or processes subcontracted to our **SUPPLIERS** to achieve, together with a continuous evaluation of them, a higher quality in our supplies and environmental compliance on your part.
- Detect and provide **TRAINING** and **MOTIVATION** to staff, thus involving all employees and coordinating efforts to meet quality and environmental standards, and customer needs.
- Reduce non-conformities in our products with the goal of **achieving ZERO DEFECTS**.
- Process optimization for **CONTINUOUS IMPROVEMENT**, taking into account the **PREVENTION OF CONTAMINATION**, in coherence with the life cycle of the products, and the minimum generation of scrap.
- Detect and provide the technical and human **RESOURCES** necessary for the proper performance of **PSG's** activities, being, therefore, always informed of the latest technologies to be more competitive every day.
- Collaboration with other interested parties to comply with customer, internal, legal and regulatory requirements.
- Promote Corporate Social Responsibility as a mechanism to improve relations between PSG and all interested parties.

Everyone's commitment to current legal regulations, prevention of occupational accidents, concern for the environment, training and information for personnel, organization, discipline and continuous improvement, must be pillars that allow us to do more and more. competitive our company.
